

IT'S NOT JUST YOUR CONTENT. IT'S YOUR DELIVERY.

It can be hard to know where to begin when designing a training solution. Here's a good starting point to determine the best delivery method for your content.

LET'S GET STARTED

Knowledge

The What and Why

Podcast

Borrowing from the popular media format, Podcasts are an excellent way to educate team members, allowing them to absorb information at their own pace in a familiar style.

Infographics

Visual tools help to reinforce concepts, and the Infographic remains a popular delivery method as it clearly outlines vital data and information in a memorable and engaging way.

Animations

Another popular visual option, Animations are a great way to educate learners. By imparting critical information in

an entertaining way, you can increase both retention and engagement.

Group Discussions

Part team-building, part training, Guided Group Discussions are a great way to build relationships among team members while educating them on key concepts.

Pitch

These interactive modules from Unboxed's Training Technology team organize key concepts in an interactive, data-based tool, making it effective for knowledge acquisition and knowledge sustainment (refresher training).

Knowledge + Skills

The What, The Why, The How

Instructor-Led Trainings (in-person or virtual)

Instructor Led Training (ILT) or Virtual Instructor Led Training (vILT) allows you to build upon learned knowledge by giving learners a chance to put knowledge and skills into practice through classroom activities.

The bonus of vILT is it allows you to reach learners near and far with training that's as equally engaging, interactive, and effective as in-person training — without the pricey travel costs.

Interactive Learning Guides

Self-paced and fully interactive eLearning, our Interactive Learning Guides (ILG) keep learners engaged at every

step. With a modern, web-like interface, video, animation, gamification, and interactive exercises, ILGs create an engaging experience for learners, making them effective for both knowledge and skills training.

Videos

Taking cues from what many learners engage in on their own time, videos are an incredibly popular choice to help learners improve their skills in addition to reinforcing their knowledge.

Skills + Behavior

The How and The Action Taken

Group Participation, Hands-On Activities, Role Plays, On-the-Floor Training, Mentor Shadowing Each of these training delivery methods differs in their approach but share the same goal: to allow team members to improve their skills in settings and situations where they actually use them.

Behavior

The Action Taken

Huddles

Combining the benefits of group participation, hands-on activities, and role play along with direct coaching, Huddles are an excellent training method to help shape and improve behaviors.

Video Simulations

Offering the same advantages of a Huddle, Video Simulations allow geographically dispersed teams the opportunity to observe team member behavior and coach them to be more effective in their approach.
